## WallWalker Aluminum Hanging Scaffold System

**NEW!**

## Over-the-Wall Hanging Scaffold Systems

Both our aluminum WallWalker and steel WallCrawler hanging scaffolding systems are perfect for soffit, truss, roofing and fascia installation. They conveniently hang over concrete or wood walls. Each system is rated for a capacity of 2 workers plus 75 lbs for every 8'. They can additionally be installed as a through-the-wall configuration and provide appropriate fall protection when used in accordance with instructions.

*When used in accordance with instructions this product meets or exceeds Government Industry Standards and ANSI Recommendations*
